izracuna se struja svake grane prema jednadžbi.

$$I_i = (E_i - U_{ab}) \cdot G_i$$

21. Ogledni primjer

Zadana je mreža sheme spoja prema sl. 1.21c. Naponi izvora su U₁, U₂ i U₃, a otpori trošila su R₁, R₂, R₃, R₄, R₅ i R₆. Primjenom Millmanova teorema odredite struje grane mreže I1, I2, I3, I4 i I5.

Podaci:

$$U_1 = 10 \text{ V}$$

 $U_2 = 50 \text{ V}$
 $U_3 = 5 \text{ V}$
 $R_1 = R_6 = 2 \text{ k}\Omega$
 $R_2 = 1.5 \text{ k}\Omega$
 $R_3 = 0.5 \text{ k}\Omega$
 $R_4 = R_5 = 5 \text{ k}\Omega$

Sl. 1.21c.

Napon čvora Uab je

$$U_{ab} = \frac{\sum U_i G_i}{\sum G_i}$$

$$U_{ab} = \frac{-U_1 \frac{1}{R_1} + U_2 \frac{1}{R_2 + R_3} + 0 \cdot R_4 - U_3 \frac{1}{R_5} + 0 \cdot \frac{1}{R_6}}{\frac{1}{R_1} + \frac{1}{R_2 + R_3} + \frac{1}{R_4} + \frac{1}{R_5} + \frac{1}{R_6}}.$$

Uvrštavanjem zadanih vrijednosti napona i otpora dobit ćemo:

$$U_{ab} = \frac{-10\frac{1}{2000} + 50\frac{1}{1500 + 500} + 0 \cdot \frac{1}{5000} - 5\frac{1}{5000} + 0 \cdot \frac{1}{2000}}{\frac{1}{2000} + \frac{1}{1500 + 500} + \frac{1}{5000} + \frac{1}{5000} + \frac{1}{2000}}$$

$$U_{ab} = 10 \text{ V}.$$

Struje grana mreže su:

$$I_{1} = \frac{U_{ab} - (-U_{1})}{R_{1}} = \frac{10 - (-10)}{2000} = 10_{mA},$$

$$I_{2} = \frac{U_{2} - U_{ab}}{R_{23}} = \frac{50 - 10}{2000} = 20_{mA},$$

$$I_{3} = \frac{U_{ab}}{R_{4}} = \frac{10}{5000} = 2_{mA},$$

$$I_{4} = \frac{U_{ab} - (-U_{3})}{R_{5}} = \frac{10 - (-5)}{5000} = 3_{mA},$$

$$I_{5} = \frac{U_{ab}}{R_{6}} = \frac{10}{2000} = 5_{mA}.$$
